Welcome to another special update... This one's taken a fair old while to get right...but finally, I am proud to bring you T3D Spider Anatomy, an interactive flash presentation showing you round the bodyparts of our favourite animals.... You'll need your speakers turned on & up, flash 8 or above, and broadband would be very helpful indeed - its a 2 MB file.Please click the link below to open a new window, and take you there...enjoy - JW
